

Setting Up Smart Plugs

A smart plug can be set up with its companion app. Once this is done it can also be linked to a digital voice assistant using the relevant skill. To set up a smart plug:

- 1 Plug the smart plug into a socket and turn it **On**
- 2 Download the related app for the smart plug and open it on your smartphone or tablet
- 3 Create a linked account for the smart plug, using the app
- 4 Tap on the **+** button to add the smart plug

- 5 Select the **Add a Smart Plug** option (if the app can connect a variety of devices) to connect the smart plug
