

Using the Lock Screen

To save power, it is possible to set your iPhone screen to auto-lock. This is the equivalent of the Sleep option on a traditional computer. To do this:

- 1 Tap once on the **Settings** app

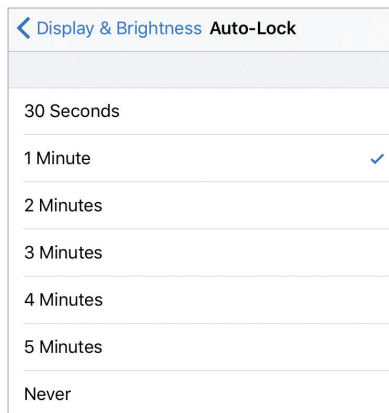

- 2 Tap once on the **Display & Brightness** tab

- 3 Tap once on the **Auto-Lock** option

- 4 Tap once on the time of non-use after which you wish the screen to be locked

- 5 Once the screen is locked, look at the screen and swipe up from the bottom of the Lock screen to unlock the screen

The screen can also be locked by pressing once on the **On/Off** button on the right-hand side of the iPhone's body.

For older iPhones that have a physical Home button and run iOS 14, the iPhone is unlocked by pressing the Home button once if Touch ID has been set up (**Settings** > **Touch ID and Passcode**).

Swipe from right to left on the Lock screen to access the camera.
