

# More Office Mobile

Microsoft has also produced versions of the Office applications for mobile devices based on Windows and on Android systems. Each includes 12 apps like those provided for iOS (see pages 230-231) but specifically tailored to match the characteristics of the particular devices.

- Go to the web page [products.office.com](https://products.office.com), and search for “Get Office for Windows 10 Mobile”

Office for Windows 10 Mobile can be installed on any tablet device that uses the Windows 10 system. Earlier versions of Windows will not support these apps.

- Go to the web page [products.office.com](https://products.office.com), and search for “Get Office for Android”

Office for Android can be installed on tablets and phones running any of the last four major versions of Android and have an ARM-based or Intel x86 processor. Support for KitKat devices will continue until June 2019.
